

Home Care Package Environmental Scan – Victorian Healthcare Association

The Victorian Healthcare Association engaged HMA to develop a:

‘... high-quality home care package environmental scan document that aims to increase the understanding of the changing market in which hospitals and registered community health services deliver HCP[s].’

To deliver the environmental scan, HMA will consider relevant policy documentation, reviews of the aged sector, aged care reforms, existing HCP provider and consumer resources, financial insights into the HCP market and the relevance of the market to public providers.

The method HMA will apply to deliver the environmental scan and case studies consists of the following four stages, together with the milestones associated with each stage.

- Stage 1: Initial scoping and planning
 - Milestone: submission of proposed project plan and scope
- Stage 2: Research, consultations and case study development
 - Milestone: submission of scoping document
- Stage 3: Information consolidation
 - Milestone: draft document submission
- Stage 4: Finalisation
 - Milestone: final document submission

The project commenced in March 2019 and will be completed in May 2019.
