

Project: Analysis of brain cancer platforms and technologies

Client: Cancer Australia

HMA is proud to be working with Cancer Australia and the Australian Brain Cancer Mission to undertake an analysis of brain cancer platforms and technologies. The aim of the project is to identify existing, emerging and horizon platforms and technologies that will enhance brain cancer research, diagnostics and treatment over the next five to 10 years.

HMA has teamed up with a panel of expert advisors to support the project. Broader consultation with stakeholders will occur in February and March 2020. For further information please contact HMA on 03 8415 0936 or hma@hma.com.au
